

"ORDER WISELY"

BEST PRACTICE ORDERING AND PRESCRIBING FOR HIGH VALUE CARE

2018

FRIDAY, SEPTEMBER 21ST 2018 | BALTIMORE CONVENTION CENTER

► Objectives

After participating in this program, medical providers will gain understanding in:

Appropriate imaging selection for a range of common clinical indications.

Resources available to guide imaging appropriateness.

Judicious use of tests and treatments for a range of outpatient and inpatient conditions.

Stewardship of imaging and antibiotics for infectious processes and their mimics.

This activity has been approved for AMA PRA Category 1 Credits™ and ABIM MOC Points will be available.

ABOUT

A leading principle of high-value practice is avoidance of unnecessary tests and treatments in accordance with established clinical practice guidelines. To reinforce this practice, we designed a full day educational program that reviews appropriate use of imaging exams, lab tests, medications, transfusions and other treatments. An understanding of the evidence behind appropriate ordering is important to change long-standing practice habits and overcome concerns about missed diagnoses. Included are presentations to guide appropriate use of imaging exams, to ensure that providers are prepared for the CMS Appropriate Use Program that will include evaluation of their ordering appropriateness beginning in January 2020.

WHO SHOULD ATTEND

This activity is intended for practicing physician and nonphysician providers in all medical and surgical specialties, including faculty, nurse practitioners, physician assistants, house staff and students.

PROGRAM

MORNING

Appropriate Imaging for CMS PAMA AUC Priority Clinical Areas & More

Headache, Sachin Gujar, MD

Neck Pain, Ari Blitz, MD, PhD

Low Back Pain, Gary Gong, MD

Shoulder Pain,
Shivani Ahlawat, MD

Hip Pain, Shadpour Demehri, MD, PhD

Chest Pain, Jeff Trost, MD

Pulmonary Embolism,
Pamela Johnson, MD

Abdominal Pain, Pamela Johnson, MD

**Managing Incidental Findings on
Body Imaging**, Pamela Johnson, MD

**Radiation Exposure from CT: Facts vs
Myths**, Mahadaveppa Mahesh, PhD

**Best Practice Breast Imaging
(Screening, Mass, Pain)**
Lisa Mullen, MD

Lung Cancer, Cheng Ting Lin, MD

AFTERNOON

High Value Hospital Medicine

Inpatient Hypertension,
Andrew Parson, MD

**Hospital Acquired Acute Kidney
Injury**, George Hoke, MD

Noneurologic Syncope,
Lenny Feldman, MD

TIA & Stroke, Toyin Idowu, MD

**Optimizing Catheters (Peripheral IVs,
PICCS, & Midlines)**, David Bozaan, MD

C Difficile Testing and Treatment,
Clare Rock, MBBCh

**UTI vs Asymptomatic
Bacteriuria/Pyuria**, Valeria Fabre, MD

Targeted antibiotic therapy for LRTI
Jennifer Townsend, MD

**Cellulitis & Mimics: Imaging &
Antibiotics**, Jennifer Townsend, MD

Paraneoplastic Syndrome: Labs & PET,
John Probasco, MD

Transfusions, Steve Frank, MD, PhD

VTE Prophylaxis, Brandyn Lau, MPH

Low Value Labs, Mike Borowitz, MD, PhD
