## DESIGN AND IMPROVEMENT OF VALUE-BASED CARE

### Provision of better Care for Patients

- Employ physician-led governance model
- Understanding shared health needs of patients
- Risk Stratification of patient population to that lead to better patient outcomes

### Improve Population Health

- Participate in community and interdisciplinary research
  1. Risk based contracting with health plans
  2. Acquisition/merge with other physical/behavioral health groups with complementary missions with select hospitals – expanding partnerships
- Switch to value-based care model
- Patient Care Coordination and Care Navigation

### Lower Costs and Quality Improvement

- Participate in value-based care contracts with Managed Care Organizations
- Quality improvement of clinical measures
- Closing Gaps in Care

### Counter Mechanism to Clinician Burnout

- Measure health outcomes and costs leading to clinician's productivity and ability to achieve results

## ADVANCED HEALTHCARE INITIATIVES

 <p><b>TELE-BEHAVIORAL HEALTH</b></p> <p><i>Providing psychiatric healthcare at the convenience of one's home to make mental health more accessible to larger populations</i></p>	 <p><b>COMMUNITY HEALTH IMPROVEMENT PLAN</b></p> <p><i>Develop and implement a CHIP (Community Health Improvement Plan) to strategize and prioritize healthcare for medically underserved.</i></p>	 <p><b>RISK STRATIFICATION</b></p> <p><i>Stratification of patients and assigning a risk score based on their underlying conditions to aid in better chronic disease management.</i></p>	 <p><b>PRESCRIPTION HOME DELIVERY SERVICES</b></p> <p><i>Homodelivery of medications to patients specifically to high risk and non-ambulatory patients.</i></p>	 <p><b>MCO PARTNERSHIPS</b></p> <p><i>Establishing partnerships with Managed Care Organizations to organize MCO days to prioritize care to underserved populations.</i></p>
